CASE STUDY

FIRE DAMAGE REFURBISHMENT
LUTON, BEDFORDSHIRE

THE JOB

This has been one of our longest projects, having finished this over a 3 year period due to complications with the clients' insurance company. We have had to leave site on two occasions before being instructed to return, to keep in line with the insurance company. So this project was completed in 3 stages.

This was completely stripped back to bare brick work, remove some asbestos, cleared all the debris and made structurally safe. Once we had achieved this, we then refurbished the property into a ground floor commercial space and a one bed flat on the first floor.

The client is happy with the finished project so that's good for me/us. Well done everyone
