# CASE STUDY

OFFICE BUILD WITHIN BARN  
OFFLEY, HERTFORDSHIRE

# THE JOB

MC Building Solutions Ltd needed a home and what is better than building your own space? Nothing!

We decided on an empty unit down at Offley Hoo Farm in Hertfordshire. It had the space for a workshop and office space and the team have a vision to make it a reality.

We built two rooms to the far left of the workshop area for our storage and also a small office for Access Security, a locksmiths in Luton. We kept the workshop as it was, just adding our shelving. Matt and the guys are thrilled with their workshop space. Newly built and designed perfectly so the vans can be reversed in and loaded more efficiently.

The office space consists of 1 large office for Danie and admin, with seating area for client meetings, 1 smaller office for Matt, 1 cleaning/storage cupboard, 1 archiving room, 1 kitchen, 2 bathrooms and 1 shower room.

Everyone is thrilled with the space we created and it's lovely to have something to this size, that is also in a great location for all areas we cover.
