# CASE STUDY

OFFICE REFURB  
WHITELEY, HAMPSHIRE

# THE JOB

Our Director has previously worked alongside Impellam Group to complete many office refurbs, maintenance jobs and more over the years. When they approached him again for a project down in Whiteley, Hampshire, we knew we'd make the exception for outside our areas.

For this project we:

- Removed and disposed of a glass screen and door
- Installed studwork, acoustic insulation and acoustic plasterboard
- Installed a ply flush door and frame with 3 point locking system
- Skimmed both sides of wall to the office
- Installed 2no double sockets, 2no spurs and 4no data lpoints (fed from floor box)
- Installed grey slatted wood acoustic panels to all walls
- Installed skirting
- Finished by decorating the door and frame
- Cleared site on completion

This project took 3 days to complete so we put our team into a local hotel the night before we began the project and throughout.

The client was incredibly happy with the finished project.
